

Activities / excursions for bad weather

Glacier canyon Grindelwald

A masterpiece of nature, the 300m high walls of the Glacier Canyon was formed by the lower Grindelwald glacier. Sadly the lower glacier no longer exists, but the canyon itself is now thriving as a popular destination for a sensory walk through its exposed rock galleries and tunnels. The rushing water cascades freely from the mountains into the Lutschine River below, sometimes causing a sudden rush of wind through the canyon and a rapid temperature flux as rays of light reflect along the steep walls.

The newly built attraction is divided into six themes: Coincidence, Formation, Geology, Water, Glacier and Myth. An interesting experience for all ages of visitor, the Glacier Canyon is an ideal, easy-access tourist destination. Its accessibility in all weather conditions.

Funky Chocolate Club

A truly sweet affair awaits you in the heart of Interlaken! You can create your own masterpiece under the friendly guidance of a chocolatier. You will receive an apron, chef's hat and all the necessary ingredients for the workshop. You will also learn how to melt chocolate and pour shapes. You leave the workshop not only with homemade chocolate pieces, but also with newly acquired interesting information about the origin, history and production of high quality chocolate.

Trümmelbach Falls

With its ten glacier waterfalls inside the mountain, made accessible by a tunnel lift, the Trümmelbach Falls are unique in Europe. The Trümmelbach alone drains the huge glacier walls of the Eiger, Mönch and Jungfrau with up to 20,000 liters of water per second from its catchment area of 24 square kilometers, half of which is covered with snow and ice. The Jungfrau-Aletsch area has been declared a World Heritage Site by UNESCO. The Trümmelbach is listed in the "Federal Inventory of Landscapes and Natural Monuments of National Importance".

St. Beatus-Caves

Free the dragon! Hunted by the monk, St. Beatus, who lived in the 6th century, the legend tells that this mystical creature once lived in this unique environment - in the St. Beatus Caves on Lake Thun near Interlaken. Explore the inside of the mountain for about one kilometer on a well-developed and illuminated path. Discover stalactites and stalagmites that have been formed over millions of years and immerse yourself in this unique natural world under the earth. You can also visit our cave museum and learn more about the world of caves! In the museum you will learn everything there is to know about caves and speleology with the help of an audio guide.

Local museum

The Grindelwald Museum shows the development of Grindelwald from a mountain farming village to a tourist destination. Exhibition focus: agriculture and alpine farming, housekeeping, handicrafts, history of mountaineering, the profession of mountain guide, history of the Eiger, especially the Eiger north face, the origin of winter sports, models of various mountain railways, old reliefs and pictures, old photographs and postcards.

Indoor rope park

Visit the largest indoor rope park in Europe in the Grindelwald sports center ...
... whatever the weather: dry and windless in winter and cool in summer. Experience the Eiger indoors for once!

On 5 different courses with 40 elements related to the mountain, you will experience many highlights: conquer the huge icicles, fly through the air with the Haulbag or commute over the daring Hinterstoisserquergang, and that in any weather ...

The use of the indoor rope park does not require any special fitness requirements. All rope park guests are equipped with material for their independent visit to the facility and introduced by the staff.
